EDUCATION

Sagi Rama Krishnam Raju (SRKR) Engineering College, B.Tech

2023 – 2027

- Artificial Intelligence and Machine Learning, CGPA: 8.71

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, C, Dart, HTML, CSS

AI & ML: Scikit-learn, TensorFlow, Hugging Face, ChromaDB, LLM Pipelines, Computer Vision, Gradio, EDA

Backend Development: FastAPI, Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control

Web & Mobile Development: React.js, Next.js, React Native, Flutter, Vite, Tailwind CSS, Framer Motion, Firebase Auth, GoRouter

Databases: MongoDB, PostgreSQL, SQLAlchemy, Mongoose

Tools & Platforms: Git, GitHub, Android Studio, Vercel, Render, Postman, MS Power BI, n8n, Google SEO

Core CS: Data Structures, OOP Concepts, API Design, Database Design

Certifications: IBM Deep Learning Fundamentals, Google AI-ML virtual Internship, Cisco Python Essentials 1 & 2

PROJECTS

Herb Species Detection API [GitHub](#) | [Live Demo](#)

Oct 2025 – Jan 2026

Developed a scalable FastAPI inference engine to classify 92 herb species from images; engineered a hybrid pipeline combining EfficientNetV2B3 feature extraction, PCA dimensionality reduction, and SVM classification to achieve **96.6% accuracy**.

Talent Radar AI Agent [GitHub](#) | [Live Demo](#)

May 2026 – May 2026

Architected an autonomous recruitment engine using FastAPI, Next.js, ChromaDB, and a **5-agent** LLM pipeline to convert job descriptions into ranked shortlists; implemented semantic search, simulated interviews, SSE streaming, and automated fallback routing.

Soul Connect [GitHub](#) | [Live Demo](#)

Jan 2026 – Mar 2026

Built a safety-focused AI mental health assistant via FastAPI, React, and MongoDB; integrated sentiment and self-harm risk detection with fuzzy-logic urgency scoring, LLM support responses, Twilio emergency alerts, and secure chat history.

EXPERIENCE

AI/ML Engineer Intern, Shamgar Software Solutions.

Remote Oct 2025 – Feb 2026

- Engineered a Random Forest yield predictor (**97.6% R^2**) and Gradio app on 19.6K+ records, optimizing accuracy by resolving data leakage and creating interaction features.
- Trained an EEG signal classifier for Brain-Computer Interfaces, iteratively optimizing the model to boost peak validation accuracy to **78.24%** from a 50% baseline.
- Spearheaded data processing and exploratory data analysis on an EMG dataset, extracting key features and resolving dataset inconsistencies for a prosthetic control model.

AI Intern, Stikbook Inc.

Remote May 2026 – Present

- Automated high-volume data pipelines using n8n, enabling the rapid acquisition, cleaning, and preprocessing of dozens of diverse datasets without manual bottlenecks.
- Engineered generalized Exploratory Data Analysis (EDA) scripts to automatically extract statistical features and visualize distributions across varying data structures.
- Accelerated model experimentation by building scalable training loops for both classical ML (scikit-learn) and neural networks (TensorFlow), rapidly evaluating baselines at scale.

ACHIEVEMENTS

- **Runner-up, Smart India Hackathon 2025** – Ranked in the Top 5 nationally by engineering a highly scalable software solution for a problem statement issued by the Ministry of Ayush, Government of India.
- **2nd Place, Catalyst Solo Hackathon** – Outperformed 500+ developers in the Deccan AI Experts competition by architecting Talent Radar, an autonomous multi-agent AI recruitment engine, within 48 hours.
- **1st Place Winner, Text Sprouts (E-Summit 2K26)** – Secured 1st place at a National-Level Project Expo for developing an end-to-end supply chain management solution.

EXTRA-CURRICULAR ACTIVITIES

Executive Body Member, Association of Computer Engineers (ACE), SRKREC – Organized the Prajwalan 2K26 national hackathon, led the ML-Xplore workshop, and engineered custom web tools to streamline operations.
